

DBNPA

It is a high-efficiency antiseptic bactericide, widely used as water treating agent, bactericide and algacide for industrial circulating water and industrial cooling water, pulp treatment in paper making industry and as pharmaceutical intermediate, etc.

Chemical information:

Chemical name: 2,2-Dibromo-3-Nitropropion Amide

Molecular weight: 242

Structure formula:

CAS No: 10222-01-2

PRODUCTION SPECIFICATION

Appearance	White crystal powder
Active ingredient	99.5% min
Melt point	124-126° C
pH (1% solution)	4.0-6.5
Moisture	0.3% max

ADVANTAGES

- Broad-spectrum control of bacteria and fungal slime
- Water soluble for easy application
- Effective over a wide pH Rang
- Compatible with most pulp, paper, leather and water treatment

APPLICATIONS

- Pulp, paper and paperboard
- Leather
- Water treatment
- Agrochemicals

STORAGE LIFE

At least 24 months from the date of manufacture in the original sealed container at ambient temperature. Store away from excessive heat and humidity in tightly closed containers.

HANDLING PRECAUTIONS

Refer to the Material Safety Data Sheet for Potassium N-methyldithiocarbamate.

It is assured that users of our products will themselves determine the suitability of these products for their own particular purpose, and it is stressed that the information given herein are suggestions for user's guidance only, and are not intended as recommendations, neither are any of the statements made to be construed as recommendations for the infringement of any patent.
