

Bergeninum (97%)

CAS NO.: 477-90-7

Molecular Structure:

Molecular Formula: C₁₄H₁₆O₉

Molecular weight: 328.27

Category: Herbal Extract

Alias: Bergenin, Vakerin, Arolisic acid B, Ardisic acid B, Corylopsin, Cuscutin, Peltaphorin

Appearance: White crumbly acicular crystal or crystalline powder;

Properties: odorless, bitter in taste.

melting point: 232—240°C.

pharmacological functions :

Bergeninum as well as its derivatives have the biological activities of relieving a cough, the hepatic protectant, antiinflammatory, antiviral, and of the immune system regulation.
